THE CHOSEN ONE

BASED ON THE P320®, THE M17 IS THE U.S. ARMY'S CHOICE FOR TODAY AND TOMORROW.

After one of the most rigorous and highly competitive reviews in the history of military firearms, SIG SAUER Inc. was awarded the Modular Handgun System contract with a P320-based platform, the new U.S. Army M17. This was a major milestone for the U.S. Army's next replacement platform in over 30 years. The Army selected the P320 based platform because of its uniquely innovative modularity, uncompromising performance and unmatched capability.

The U.S. Army's selection of the M17 officially cements the P320's place in the historical record of the world's truly influential weapons as it enters competition with America's current and future armed forces across the globe in the defense of freedom.
